

Hosting Infrastructure

2Busy2.com uses a mission critical Data Center to provide world-class hosting for our customers. To ensure the fastest and most reliable routing of traffic, we have multiple connections to major Internet backbone carriers with OC-12 and Gigabit Ethernet connections using the BGP-4 routing protocol. The Data Center is built with N+1 redundancy throughout, including multiple HVAC systems and redundant power. Every month, the backup diesel generators are tested to make sure they are in proper functioning order in case of power grid failure. The Data Center's physical security is entrusted to 24x7x365 live monitoring, CCTV, and biometric access control system.

Account Resources	Basic	Standard	Advanced	Ecommerce	Webmaster
Disk Space (mb)	100	500	2,000	3,000	5,000
Data Transfer (mb)	5,000	20,000	50,000	60,000	100,000
Price per Month (\$USD)	\$11.95	\$19.95	\$29.95	\$49.95	\$69.95
